### **DETAILED ACTION**

1. According to a preliminary amendment ( paper no. 5 ) filed on Oct. 11, 2001, the applicants have canceled claims 1-21 and furthermore, have added new claims 1-6. The newly added claims 1-6 are renumbered as claims 22-27, respectively.  
2. Claims 22-27 are now pending in the application.

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 2 and 6 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kuhar ( U.S. Patent no. 6,358,492 ).

Kuhar discloses dopamine transporter imaging ligand. The compounds disclosed in examples 2a, 2b, 2c, 2d and claim 1 of Kuhar clearly anticipate the compounds of instant claims when R1

Art Unit: 1625

represents COOR<sub>a</sub> and R<sub>a</sub> is methyl and R<sub>2</sub> is a substituted phenyl in the instant compounds of claim 1.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clarke ( U.S. Patent no. 3,813,404 ), Kuhar ( U.S. patent no. 5,496, 953 ), Davies ( U.S. Patent no. 6,008,227 and U.S. patent no. 5,760,055 ) in view of Kuhar ( U.S. Patent no. 6,358,492 ).

Clarke, Kuhar and Davies all disclose Tropane derivatives. The disclosed compounds of Clarke ( see examples 1-14 and claims 1-8 ), Kuhar ( see compounds RTI-183, RTI-218 and RTI-228 in table II ), Davies ( see compounds in table I ) differ from the instant compounds in having the instant R<sub>2</sub> group as 3-beta isomer instead of 3-alpha isomer. However, Kuhar ( U.S. Patent no. 6,358,492 ) teach that 3-alpha isomers of several 3-beta ( substituted phenyl ) tropanes exhibit selectivity for dopamine transporter since their affinity for serotonin transporter is reduced ( see col. 2, lines 14-27 ). Therefore, one skilled in the art would be motivated to prepare the instant selective dopamine ligands ( 3-alpha isomers of tropane derivatives ) by modifying non-selective dopamine and serotonin ligands ( 3-betaisomers of tropane derivatives ) of Clarke, Kuhar and

Art Unit: 1625

Davies since Kuhar teaches the selectivity of 3-alpha isomers for dopamine transporter over 3-beta isomers ( see table 3 ).
